

## • Nozzles for Band Saws

Nozzle heads for band saws have been designed in such a way that saw blade heights from 34 – 90 mm can be covered. Due to the design with three nozzles fitted both the saw teeth as well as the back of the blade are lubricated.

### UNICUT® Stainless Steel U-shaped Nozzle Head

- Nozzle: 3 x 7 mm
- Type of processing: Band saw 
- Up to a saw blade height of 67 mm

### UNICUT® U-shaped Nozzle Head

- Nozzle: 3 x 7 mm
- Type of processing: Band saw 
- Up to a saw blade height of 80 mm

## • Nozzles for Custom Application

Due to the modular design of the UNICUT® MMS systems custom solutions can be implemented easily and cost-effectively. Successfully accomplished projects include those in profile lubrication, profile cleaning, strip slitting and many more.

### UNICUT® Extended Nozzle with Stainless Steel Tube

- Tube Ø 8 mm
- Nozzle: 1 x 7 mm
- Material: 1.4301
